ELECTRIC TARIFF

Your Touchstone Energy® Partner

Schedule A – V Single Phase Service, Village (Rate 58)

Class of Service:

Single-phase, alternating current, at available secondary voltages.

Availability:

Available to all Members residing in high density (Incorporated Village/City) of at least 10 consumers per mile and average monthly usage exceeding 500 kWh's per location.

Members who require single-phase service through a single meter as described in "The Wireman's Handbook", all subject to the terms of the membership application approved by the Board of Directors. Availability is also subject to the established rules and regulations of the Cooperative.

Monthly Prices:

<i>Transformer size</i>	<i>1½ - 10 kVa</i>	<i>15 & 25 kVa</i>	<i>37½ kVa & Greater</i>
<i>Facility Charge</i>	<i>\$13.20 / month</i>	<i>\$24.00 / month</i>	<i>\$29.00 / month</i>
<i>All Energy</i>	<i>\$0.0925 per kWh</i>		

Where multiple services receive service from one transformer, all service locations receiving service from said transformer, will receive the lowest Facility Charge under this rate schedule.

Minimum Monthly Price:

The minimum monthly charge, under the above prices, shall be the facility charge associated with the size transformer required for providing service to the corresponding location.

All Rates:

Minimum applies 12 months per year even when disconnected. If meter is removed billing will stop. When service is reconnected a bill will be rendered for months not billed. This applies to service disconnected for up to 2 years.

Issued: August, 27 2007

Proposed Effective: November, 01 2007

Issued By: Wilmer Lupepantog Title: President Effective: 11/01/2007

Clark Electric Cooperative

ELECTRIC TARIFF

Billing:

The bill is the amount computed when applying the facility charge, the power cost adjustment and the above price to the number of kWh's consumed. All applicable charges including, but not limited to security lighting, load management devices, taxes, and Commitment to Community charges. Bills are rendered on or about the 5th day of each month and the bills are due on or about the 25th of each month. The bill becomes delinquent if not paid within 20 days of the billing date and late payment charge shall apply after that date.

When payment is made after the due date, a late payment charge is added. The late payment charge will be 3% of the current portion of the unpaid billing.

The gross rates will be applied to those accounts with current bills unpaid at the next billing cycle.

When service is connected or disconnected the monthly facility charge shall be prorated for the number of days available.

Budget Billing:

The terms and conditions of the Cooperative's Budget Billing Program are contained in Clark Electric's Governing Policies – Section V, Policy 500, 1-E

Taxes:

Any taxes, based on revenue from the sale of electric energy which the cooperative is required to collect will be itemized on the bills and subject to the same terms of payment as are the energy charges.

Purchased Power Cost Adjustment:

Purchased Power Cost Adjustment can be found in Rider 1.

Issued: August, 27 2007

Proposed Effective: November, 01 2007

Clark Electric Cooperative

ELECTRIC TARIFF

Your Touchstone Energy® Partner

Schedule LP – Primary (Rate Code 63)

Class of Service:

Three-phase, alternating current, at available standard voltages.

Availability:

Available to Members with greater than 25KW peak demand or larger than a 45kVa capacity on or near the cooperative's three phase, subject to the terms of the membership application approved by the Board of Directors, and to the established rules and regulations of the Cooperative. A five (5) or ten (10) year service contract is required.

Monthly Prices:

<i>Facility Charge</i>	<i>\$70.00 per month</i>
<i>All Energy</i>	<i>All kilowatt-hours at \$0.0535 per kWh plus Power Cost Adjustment. Primary metering service energy shall be reduced 2% (before energy charge).</i>
<i>Demand Charge</i>	<i>\$8.50 per month per kilowatt of billing demand on-peak; and \$1.30 per KW off-peak demand.</i>

The on-peak period shall be from 5:30 p.m. to 8:30 p.m. Off-peak shall be all other time other than the on-peak period. Billing period times subject to change.

The billing demand shall be the maximum kilowatt established by the consumer for any consecutive fifteen minute period during the month for which the bill is rendered, as indicated or recorded by a demand meter.

Minimum Monthly Price:

In the event the monthly calculated bill is less than any of the following, the minimum monthly charge shall be the highest one of the following.

1. The minimum monthly charge specified in the service contract.
2. A charge of \$1.00 per kVa of installed transformer capacity.
3. The monthly facility charge.

in advance will be required of the full amount of the estimated bill for service, including the cost of connection and disconnection.

Conditions of Service:

Motors having a rated capacity in excess of one horsepower (1HP) must be three-phase.

All wiring, pole lines and other electrical equipment beyond the metering point shall be considered the distribution system of the consumer and shall be furnished and maintained by the consumer.

If service is furnished at primary distribution voltage, the cooperative shall have the option of metering at secondary voltage and adding the estimated transformer losses to the metered kilowatt-hours and kilowatt demand.

Any changes required in the cooperative facilities due to increased capacity or added equipment will be charged to the consumer. (Those on this rate schedule prior to 12-31-95 will be grand fathered in over a period of four (4) years. During 1996 25% of cost will be charged, 1997 50% of cost, 1998 75% of cost and 1999 and thereafter 100%)

Schedule B - Rural Three Phase Power Service (Rate Code 79)

Class of Service:

Three-phase, alternating current, at available standard voltages.

Availability:

Available to farm and residential Members adjacent to or near the three phase lines of the Cooperative for all uses including water heating and the use of a single motor in excess of Ten horsepower (10 H.P.) capacity and having separate three phase service measured through a separate meter.

A limit of 25 kilowatt demand in 15 minutes period and maximum of 45 kVa installed transformer capacity.

Over either of these limits account is to be billed under Schedule – LP, Rate Code 83.

Availability is also subject to the established rules and regulations of the Cooperative. A five (5) or ten (10) year service contract is required.

Monthly Prices:

<i>Facility Charge</i>	<i>\$45.00 per month</i>
<i>All Energy</i>	<i>All kilowatt-hours at \$0.925 per kWh</i>

Minimum Monthly Price:

In the event the monthly calculated bill is less than any of the following, the minimum monthly charge shall be the highest one of the following.

1. The minimum monthly charge specified in the service contract.
2. A charge of \$1.00 per kVa of installed transformer capacity.
3. Facility charge as specified in this price schedule.

Billing:

The bill is the amount computed when applying the facility charge, the energy charge, and the demand charges. The Power Cost Adjustment is computed to the above price to the number of kWh's consumed. All applicable charges including, but not limited

to security lighting, load management devices, taxes, and Commitment to Community charges. Bills are rendered on or about the 5th day of each month and the bills are due on or about the 25th of each month. The bill becomes delinquent if not paid within 20 days of the billing date and late payment charge shall apply after that date.

When payment is made after the due date, a late payment charge is added. The late payment charge will be 3% of the current portion of the unpaid billing.

The gross rates will be applied to those accounts with current bills unpaid at the next billing cycle.

When service is connected or disconnected the monthly charge shall be prorated for the number of days available.

All Rates:

Minimum applies 12 months per year even when disconnected. If meter is removed billing will stop. When service is reconnected a bill will be rendered for months not billed. This applies to service disconnected for up to 2 years.

Taxes:

Any taxes, based on revenue from the sale of electric energy which the cooperative is required to collect will be itemized on the bills and subject to the same terms of payment as are the energy charges.

Purchased Power Cost Adjustment:

Purchased Power Cost Adjustment can be found in Rider 1.

Temporary Service:

Temporary service such as service to constructions jobs, fairs, circuses and carnivals shall be supplied in accordance with the foregoing rate except that the consumer shall pay in addition to the foregoing charges the total cost of connecting and disconnecting service less the salvage value of materials returned to stock. A deposit, in advance will be required of the full amount of the estimated bill for service, including the cost of connection and disconnection.

Power Cost Adjustment – Rider No. 1 - Uncontrolled

Applicable to Price Schedules: 58, 71,72,78,79,80,81,82,83,88,87

Applicable to Price Schedule 58, 71,72,78,79,80,81,82,83,88,87

The Power Cost Adjustment charge shall provide for change of the price per kilowatt hour consumed to equal the average cost per kilowatt hour delivered by the utility's system. Prior to each billing cycle the Cooperative shall determine the adjustment amount to be charged for each energy unit, consumed under the rates set forth by the Cooperative. The calculation shall be:

$$EO = (CO/QO) - B$$

EO = the energy adjustment charge to be used in the next customer billing cycle rounded on a consistent basis to the nearest \$.000001/kW.

CO = the charge by the wholesale supplier as recorded in Account 555 of the Uniform System of Accounts for the month in which EO will be used for Price Schedules 58, 71, 72, 78, 79, 80, 81, 82, 83,88, and 87.

QO = the total electric energy delivered in kWh's by the Cooperative during the month in which the expense CO is incurred for Price Schedules 58, 71, 72, 78, 79, 80, 81, 82, 83,88, and 87.

B = the amount of the electric energy cost included in the base rates of the Cooperatives Price Schedules 58, 71, 72, 78, 79, 80, 81, 82, 83,88, and 87. divided by the test years kWh's sold to members under such Price Schedules.

$$B = \text{Proforma } \frac{\text{Test Year Applicable Purchased Power Costs}}{\text{Test Year Applicable kWh Sold}}$$

<i>Component 1</i>	=	\$ 7,913,810 / 152,924,874	\$.051750
<i>Component 3</i>	=	\$ 1,938,923 / 142,932,298	\$.013565
